

IDENTITY SYSTEM / VERSION 1.0

Brand Guidelines

Precision under pressure. A visual and verbal system for turning model instability into clear, reproducible evidence.

AUGUST 2026

THE PREMISE

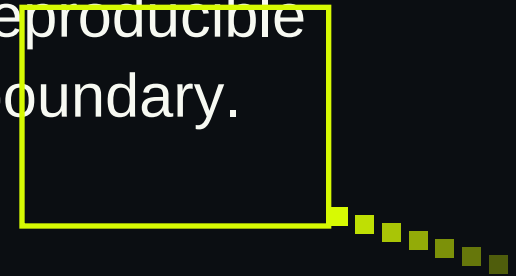

Find what breaks. Know exactly where.

CVFuzz searches for the smallest realistic transformation that destabilizes a computer-vision model. The brand makes that failure boundary visible, measured, and actionable.

BRAND PROMISE

CVFuzz turns model
instability into a
measurable,
reproducible
boundary.

BRAND CHARACTER

Rigorous, never rigid.

The system balances laboratory precision with the curiosity required to investigate unexpected failure.

01

Precise

Name the object, parameter, threshold, and evidence.

02

Investigative

Probe methodically. Let the result lead the story.

03

Calm

Report risk without fear, drama, or inflated claims.

04

Transparent

Separate observed instability from proven model error.

PRIMARY LOCKUP

The master mark

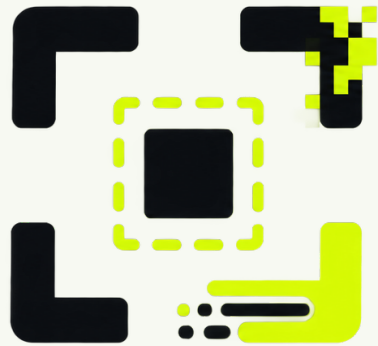

The symbol expresses controlled visual instability. The wordmark restores balance and authority. Use them together as the primary signature.

APPROVED MASTER / TRANSPARENT PNG / 2172 X 724

ANATOMY

Order meets disruption.

**01** Detection frame

Computer-vision region of interest.

02 Object target

The individual detection under test.

03 Boundary trail

The smallest controlled break in stability.

04 Stable wordmark

Weight and geometry restore confidence.

CVFUZZ

CLEAR SPACE

Give the signal room.

Define x as the height of the lime bar above the F. Keep at least 1x clear on every side; use 2x for covers and hero moments.

DASHED LINE = PROTECTED CLEAR SPACE

SCALE

420 PX / HERO

280 PX / DOCUMENTATION

180 PX / DIGITAL MINIMUM

Below 180 px, use the name as live text until an approved symbol-only asset exists. Never crop the master mark as a shortcut.

BACKGROUND CONTROL

Contrast without compromise.

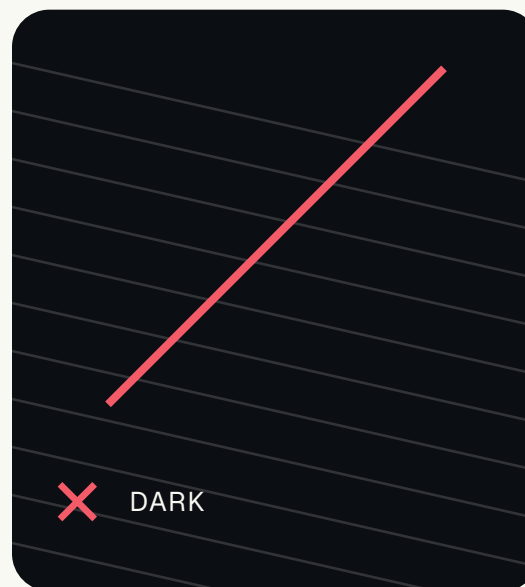

✓ WHITE

Primary

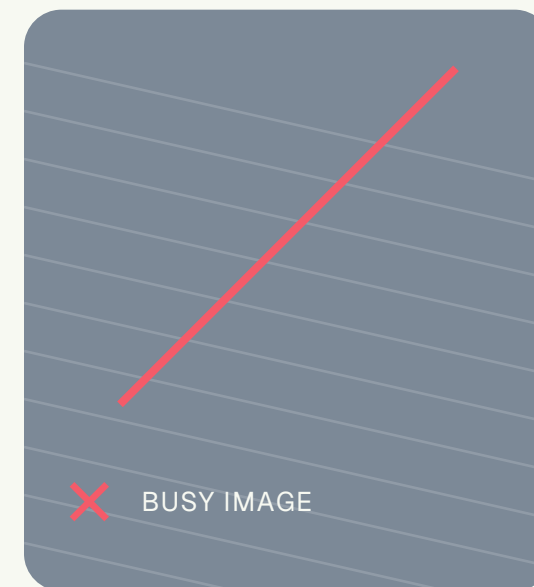

✓ PAPER

Preferred neutral

✗ DARK

Reverse asset required

✗ BUSY IMAGE

Use a light panel

MISUSE

Do not dilute the idea.

01

Stretch or rotate

Protect recognition and intent.

02

Change brand colors

Protect recognition and intent.

03

Add glow or shadows

Protect recognition and intent.

04

Create extra glitch

Protect recognition and intent.

05

Place inside a badge

Protect recognition and intent.

06

Retype the wordmark

Protect recognition and intent.

CORE PALETTE

Color is signal.

Use Signal Lime at 10% or less. Its power comes from scarcity: focus, boundary, selected object, or a short data highlight.

ACCESSIBILITY

Contrast with intent.

Aa 18.22:1 AAA	Aa 16.18:1 AAA	Aa 19.34:1 AAA	Aa 1.20:1 FAIL
Ink on Paper	Ink on Signal	Ink on White	Signal on White

Never use Signal Lime as small text on white. Never make color the only carrier of state; pair it with a label, icon, shape, or pattern.

PRIMARY TYPEFACE / GEIST SANS

Precision under pressure.

Geist Sans is direct, compact, and contemporary. It carries brand headlines, interface language, reports, and long-form explanation.

REGULAR / MEDIUM / SEMIBOLD

Aa 01

SENTENCE CASE BY DEFAULT

TECHNICAL TYPEFACE / GEIST MONO

Evidence has a voice.

```
$ cvfuzz run yolo11n.pt street.mp4  
transform      motion_blur  
object         bicycle #04  
boundary       kernel_size = 11 px  
status         confidence_collapse
```

Use the mono channel for commands, model identifiers, parameters, seeds, thresholds, and reproducibility metadata. Never set narrative paragraphs entirely in monospace.

VERBAL IDENTITY

Say what happened. Then prove it.

PREFERRED PATTERN

Observation -> Boundary -> Reproduction

The bicycle detection fails at a motion-blur kernel of 11 px. Reproduce it with the saved configuration and seed.

USE

Probe. Boundary. Evidence.
Reproduce. Compare. Stability.
Minimum breaking change.

AVOID

Unbreakable. AI-proof. Perfect. Guaranteed.
Smartest.

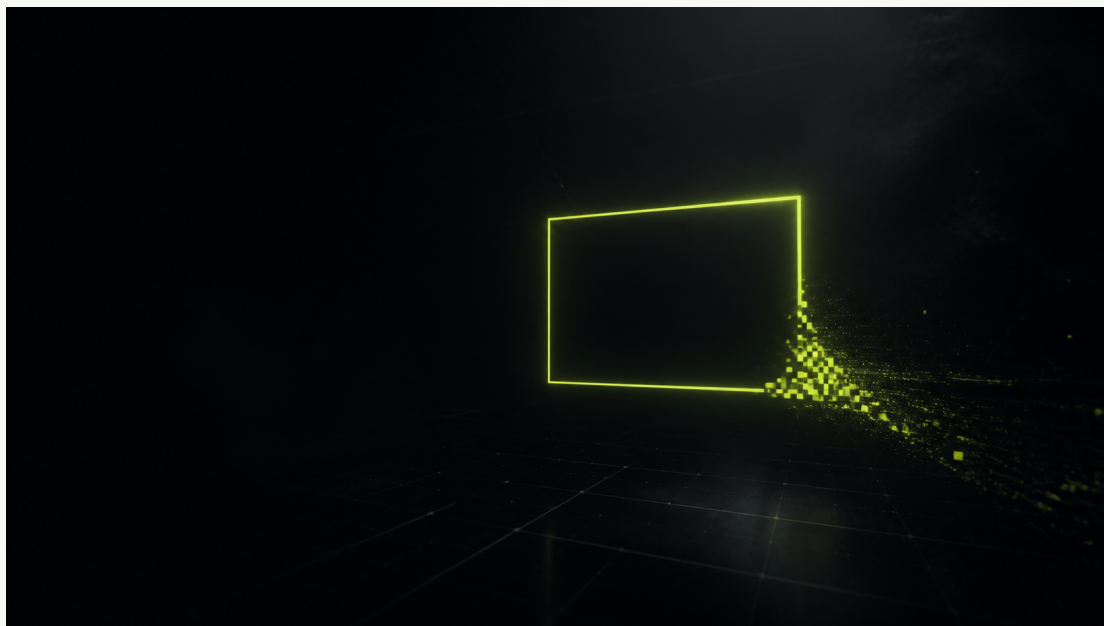

VISUAL GRAMMAR

One deliberate break.

ART DIRECTION

Evidence, made cinematic.

ABSTRACT BOUNDARY

PRODUCT IN CONTEXT

Deep blacks, realistic transformation artifacts, authentic model outputs, restrained overlays, and a single signal-lime focal point.

APPLICATION / PLATFORM

The interface is the evidence.

Frames, detections, parameter sweeps, and failure boundaries should carry the visual identity. The logo appears once; the work stays central.

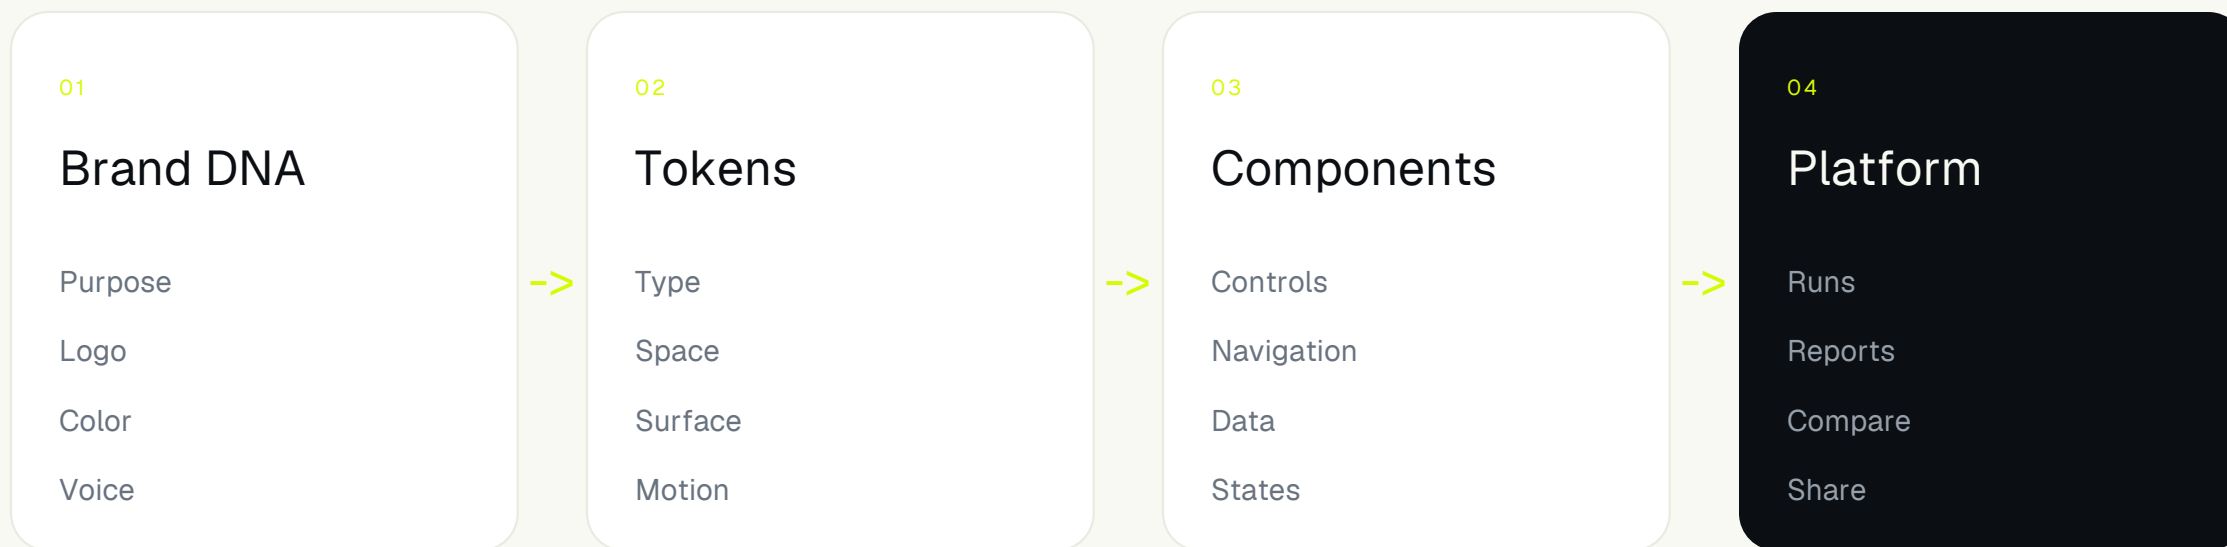

CONCEPTUAL APPLICATION MOCKUP

BRAND -> DESIGN SYSTEM

Build from stable DNA.

Semantic states and data colors remain independent from brand color. Signal Lime may guide focus, but it cannot mean success, warning, error, and information at the same time.

ASSET ROADMAP

Grow one system, not many.

NOW

NEXT

LATER

Foundation

- 01 Master lockup
- 02 Brand book
- 03 Core palette
- 04 Voice

Production set

- 01 Vector master
- 02 Reverse mark
- 03 Monochrome
- 04 Symbol + favicon

Product system

- 01 UI tokens
- 02 Components
- 03 Data palette
- 04 Motion language

Do not auto-trace the PNG and call it final. Production variants must be redrawn cleanly and approved as one coordinated family.

BRAND ESSENCE

Controlled distortion. Clear evidence.

Find what breaks. Know exactly where. Make every
result reproducible.
